

AVATOUR

AVATOUR

Avatour is the remote collaboration platform for on-site meetings.

With real-time 360° video capture, users can create immersive experiences that enable teams to **meet and collaborate on site virtually**.

Avatour uses off-the-shelf hardware to provide a live 360° view of a physical location, and can be experienced via a web browser or optional VR headset.

Igloo turns any room into an immersive workspace.

Choose an off-the-shelf structure, like a dome, cylinder or cube, and transform any existing room into an immersive space.

An Igloo immersive space is like stepping inside a giant VR headset to effortlessly engage with colleagues based anywhere in the world.

Step 1: Capture in Real-Time 360°

Use Avatour to capture the environment live in 360°. Optionally, you can record and upload videos for more flexible collaboration.

The Avatour kit includes everything you need to get started.

Step 2: Cast to an Igloo

Project the live 360° feed from Avatour to an Igloo to collaborate more effectively with remote teams.

360° Field-of-View
provides an unobstructed view of the space or location.

Look Around Freely
Give remote guests individual control over their POV to feel physically present.

Asset & Screen Share
with built-in storage - PDFs, videos, images, and more.

Improve Collaboration
Enable remote teams to collaborate on-site.
